

Sprayer 6903-WS-82CP

INTRODUCTION:

Since time immemorial, the ladle has been used to wash and clean the body. This classic design not only reserves and figures of the primary ladle image, but when we use this Story Sprayer, JUSTIME sincerely hopes the design will be popular among everyone- reminding the adults of the past about the original charming and also allowing the kids to experience the beauty of traditional and modern times.

DESCRIPTION:

- 1.Unique style gives the product round and cute characteristics. The lovely appearance makes customer feel more friendly, which shortens the distance between the product and the users.
- 2.Push valve can control the water volume.
- 3.Sprayer could be put in the semicircular bracket easily based on slanting semicircular bracket and precise design of the sprayer neck.
- 4.Sprayer has to be taken off from the slanting bracket, and it won't fall off easily.
- 5.Water flow can be controlled by angle stop.
- 6.The optional check valve and flow restrictor could be assembled into the sprayer.
- 7.Porcelain handle made by high pressure molding is against UV and color fading.
- 8.Material of inner PVC tube can bear 10Kg/cm² water pressure and 60°C heat.
