

Function 2

Sensor Basin Faucet (Cold Only)(DC) 7797-S0-80CP

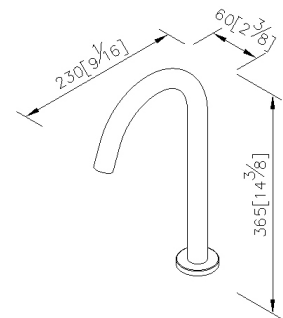

INTRODUCTION:

In the earlier periods, the principal Greek architectural feature emphasizes on column. As the temple developed towards a more elegant architectural style, the columns became more and more slender. The Temple of Athena Nike and Parthenon become the famous edifice as the cylindrical element. Inspired by the column as main idea, Function 2 series has been designed with simple but elegant cylindrical shape, which displays a sense of simplicity and harmony.

DESCRIPTION:

1. Infrared Sensor Automatic Detection.
2. Safety Guard: Valve will be shut off automatically if water keeps flowing over 60sec.
3. Automatically detect the environment, adjust the sensor, and anti-interference function.
4. Inner filter prevents the blockage of sensor valve.
5. Power Source: Alkaline Battery AA x 4, DC6V(1.5V x 4).
6. Battery life test: about 300,000 times by alkaline battery; about 100,000 times by carbon zinc battery.
7. Flush Mode: Water start flowing if valid sensing around 0.5sec~1.0sec.
8. Low power alert: When battery power is low, red indicator light will flash for battery replacement.
9. The faucet valve can stand the pressure from 0.5 to 6 kgf/cm².
